

BUNDARRA SKI CLUB INTERNET POLICY:

Access to the club's wireless network is available as a service to members and guests during the ski season.

Our Internet plan offers ample bandwidth for general use. There is a monthly usage limit so please be considerate of other users. Once the limit has been reached, the service will slow.

Members and guests are asked to be mindful of the following guidelines:

- Wireless access is provided for checking of emails and general browsing of the Internet.
- Please turn off your operating system/software/antivirus/ spyware updates.
- Please do not download/upload songs, games, programs, webpages, chat sessions or software.
- Please do not stream video and audio.

The network is password protected. To gain access to the network, members and guests should consult the manager. Parents/carers are expected to monitor their children's access to the Bundarra wireless network to ensure the guidelines are being adhered to.
